

# Garment System

Garment System is a Canadian sourcing agency specializing in garment manufacturing. Our production facility is based in Guangdong, China, with an office in Montreal's Garment District. We simplify garment production for our clients by removing the hassles of creating lengthy tech packs and tying all their diverse merchandising needs under one point of communication.

## Cut & sew garments

Whether you're developing activewear, streetwear, or high fashion, our supply chain is built to support your needs with flexible quantities and competitive pricing. Combining our in-house sample room and a curated network of specialized factories, we make it possible to prototype quickly and produce at optimized prices for every quantity without compromising on quality. We guide you through every step, from fabric sourcing and pattern development to sampling and final production. Our cut-and-sew service is ideal for brands that want full control over fit, finish, and fabrication, not just a logo on a tee.

Custom blanks

For brands looking to move faster without compromising on quality, our custom blanks offering strikes the right balance between efficiency and originality. We've developed a curated library of ready-made silhouettes including heavyweight tees, hoodies, crewnecks, sweatpants, and more. Designed with premium fits and fabrics, our blanks meet the expectations of today's streetwear and fashion-forward consumers.
